Former Resin Technology President Joins NCFI Polyurethanes

MOUNT AIRY, NC—NCFI Polyurethanes announced today the addition of James Doose as a senior technical advisor. Doose, former chief chemist, founder and president of The Resin Technology Company, will work with NCFI's leadership team in analyzing and reviewing current products, and new product development.

"We are excited Jim is on board with us," says Steve Riddle, president of NCFI. "His 30 years of experience formulating thermal set resin and blowing agents, plus that of running a successful business is an ideal fit with our campaign to provide the most innovative, sustainable, and highest energy efficiency products for the U.S. building market."

Doose says, "I look forward to working with NCFI because I appreciate their commitment to new and better products, their unequaled technical approach, and their top-notch management. They are one of the last great independent systems houses in the U.S." He continues, "High performance insulation will continue enjoying its rock star status as the market demand for more energy efficient, cleaner, healthier buildings and homes grows. NCFI is uniquely positioned to be the clear, head-above-the-crowd leader at providing it."
